

# K10 Depth Unit

The K10 Depth Unit operates with either a K10 Quartz, K10 Strain or K10 Geothermal pressure and temperature gauge. The unit will display and record depth and line speed during a slickline operation. Using its built in Real Time Clock, the unit will automatically record the start date, time and record depth and line speed. This data is then merged with the tool data for depth and line speed correlation.

## Features:

- Displays and records depth and line speed
- Depth Correlation
- 24MB non-volatile memory
- Real-time display on unit
- USB Interface
- Rugged Pelican case
- Rechargeable batteries
